Ingredients

- ☐ 2 cups all-purpose flour
- ☐ 1 teaspoon baking soda
- ☐ 1/2 teaspoon baking powder
- ☐ 1/2 teaspoon salt
- ☐ 1 teaspoon ground cinnamon
- ☐ 1/2 teaspoon ground nutmeg

- ☐ 2 large eggs
- ☐ 1 cup granulated sugar
- ☐ 1/2 cup vegetable oil
- ☐ 1 teaspoon vanilla extract
- ☐ 1 1/2 cups grated zucchini (about 1 medium zucchini)
- ☐ 1/2 cup chopped walnuts or pecans (optional)

Instructions

- 1** Preheat your oven to 350°F (175°C) and line a 12-cup muffin tin with paper liners or grease it lightly. This step ensures your muffins bake evenly and don't stick. A well-preheated oven is crucial for proper rise and texture, so don't skip this. Prepare your zucchini by grating it finely and then gently squeezing out excess moisture using a clean kitchen towel or paper towels. Removing extra water prevents soggy muffins and helps maintain a tender crumb. ⌚ 10 minutes
- 2** In a large bowl, whisk together the flour, baking soda, baking powder, salt, cinnamon, and nutmeg. Mixing the dry ingredients first ensures even distribution of the leavening agents and spices, which helps the muffins rise uniformly and develop consistent flavor. Avoid overmixing later to keep the muffins tender. ⌚ 5 minutes
- 3** In a separate bowl, beat the eggs with the sugar until combined, then whisk in the vegetable oil and vanilla extract. This wet mixture provides moisture and richness. The oil keeps the muffins tender and the eggs help bind everything together. Make sure the eggs are at room temperature for better incorporation. ⌚ 5 minutes
- 4** Add the wet ingredients to the dry ingredients and stir gently with a spatula until just combined. The batter should look lumpy but without streaks of flour. Overmixing develops gluten and leads to tough muffins, so mix just until you can't see flour anymore. ⌚ 2 minutes
- 5** Fold in the grated zucchini and nuts (if using) carefully. The zucchini adds moisture and subtle flavor, while nuts add crunch and texture. Be gentle to avoid overworking the batter. ⌚ 2 minutes
- 6** Spoon the batter evenly into the prepared muffin tin, filling each cup about 3/4 full. This helps the muffins rise nicely without spilling over. You can use an ice cream scoop for consistent portions. ⌚ 5 minutes
- 7** Bake in the preheated oven for 25–30 minutes. Start checking at 25 minutes by inserting a toothpick in the center of a muffin; it should come out clean or with a few moist crumbs. Baking too long will dry them out, so keep a close eye near the end. ⌚ 25–30 minutes

- 8** Remove the muffins from the oven and let them cool in the tin for 5 minutes. This resting time helps them set and makes them easier to remove without breaking. Then transfer to a wire rack to cool completely to prevent sogginess from trapped steam. ☒ 10 minutes
- 9** Serve warm or at room temperature, optionally with a pat of butter or honey. These muffins store well in an airtight container for several days and can be reheated gently. Enjoy as a wholesome breakfast or snack that's quick and satisfying. ☒ 0 minutes

Chef Tips

☒ Squeeze excess water from grated zucchini before adding to batter.

Removing excess moisture prevents the muffins from becoming soggy and helps maintain a tender crumb. Too much water dilutes the batter, affecting texture and baking time.

☒ Use an ice cream scoop to portion batter evenly into muffin cups.

Consistent portions ensure even baking and uniform muffin size. Uneven portions can lead to some muffins undercooked or overbaked.

☒ Don't overmix the batter after combining wet and dry ingredients.

Overmixing develops gluten in the flour, resulting in tough, dense muffins. Stir just until combined for a tender crumb.

☒ Check muffins at 25 minutes with a toothpick to avoid overbaking.

Baking too long dries out muffins. Toothpick test helps catch them at perfect doneness with moist crumb.

☒ Let muffins cool in the pan briefly before transferring to a wire rack.

Cooling in the pan allows muffins to set and prevents them from breaking apart. Moving them too soon can cause crumbling.

☒ Add chopped nuts for crunch and extra flavor if desired.

Nuts provide textural contrast and complement the soft crumb. They also add healthy fats and nutrients.

☑ Use room temperature eggs for better mixing and batter consistency.

Room temperature eggs blend more easily with other ingredients, resulting in a smoother batter and better rise.

Storage & Reheating

☑ Refrigerator

Refrigerate in an airtight container for up to 5 days. Muffins may firm up slightly but will remain moist. Serve cold or warm gently before eating.

❄ Freezer

Freeze muffins individually wrapped in plastic wrap and placed in a freezer bag for up to 3 months. Thaw at room temperature or warm in the microwave before serving.

☑ Reheating

Reheat muffins in a microwave for 15–20 seconds or in a 300°F oven for 5–7 minutes. Adding a small pat of butter or a splash of milk before reheating can help restore moisture.
